~ Co-Creating with Nature ~

~ Synergistic plant medicines that fosters healing, pain and tension relief while subtly and energetically rebalancing the whole person ~

Nature provides us with an abundant source of wild plants for healing and nourishment. With Fireweed Botanicals, eighty five percent of our medicinal plants are harvested from wild local sources; the remainder from local organic gardens. We harvest ninety-five percent of the medicinal herbs ourselves in gentle, sustainable ways with ecological awareness and in co-creation with plant consciousness and the living land.

Fireweed Botanical Products Have A Unique Addition ~ Flower Remedies

Flower Remedies (FR), also called Flower Essences, are odorless liquid solutions made from the energetic imprints of plant and tree flowers that resonate with specific human virtues. They support the bodies healing ability by rebalancing the emotional, mental, spiritual and physical bodies. Flower Remedies were first developed by Dr. Edward Bach in the 1930's. Today various brands are used throughout the world by professionals and lay people for emotional/physical health and prevention. As a Bach Flower Practitioner and teacher I have witnessed time and again the healing and rebalancing capabilities of Plant Energy Medicine for people and animals. Fireweed Botanicals Are Hand Crafted In A Time Honored Tradition

Our medicinal plant oils are slowly sun or low heat extracted in quality cold pressed and organic oils. This alchemy allows the plants medicinal constituents to saturate the carrier oil, creating a therapeutic, healing plant oil lineament for external use. Our Fireweed Botanical products are made in small batches to ensure quality.

~To Scent or Not to Scent ~

During extraction time, the natural subtle plant scent also transfers into the carrier oil. Adding essential oils or fabricated scents would alter the original therapeutic properties I would like you to experience and benefit from.
