

## **Teacher, Spiritual Mentor, Medium, Energetic Sensitive, Bach Flower Practitioner:**

### ***A Session with Joanne...***

I offer you my support and skills as a Spiritual and Life Counselor of 15 years with training in Core Shamanism, Plant Spirit Medicine and as a Bach Flower trained Practitioner.

It is my compassion and fundamental nature that inspire me to be of service to others, which allows me to work easily and co-creatively with the consciousness of nature, angelic, and subtle realms available to us.

The rhythm of our Soul and Nature is often lost or buried living in the modern world. I am privileged to see and understand these aspects of an individual, offering life affirming directional sessions at the level of your soul's purpose along with practical support and guidance during that process.

Being attuned to subtle energetic patterns, I can support you in seeing and connecting more deeply with the larger picture and true purpose of your life circumstances, issues or health conditions in ways that will affirm your true nature and self healing capabilities. The Flower Remedies further support this by working gently and significantly at a core level, enabling you to shift out of old or limiting emotional and mental patterns; freeing you to live more fully, self compassionately and authentically.

As a Medium I can access your ancestors and those in the subtle realms that support you daily. I can connect you with your loved ones living or passed over, allowing communication and understanding of the greater purpose of your relationship and that individual's well being; human or animal. These interactions often comfort and affirm, giving greater insight and support to your own life path.

Having embraced my own life and challenges I have compassion and reverence for the evolving beauty, strengths and vulnerability that is the unique spark of creation we are.

*You are the Beacon of Light you have been waiting for...*

***Warmly, Joanne***
